

Fortify Security Report

3/17/26

ALBEE.LAI

Executive Summary

Issues Overview

On Mar 17, 2026, a source code review was performed over the DMP_ETL code base. 2 files, 857 LOC (Executable) were scanned and reviewed for defects that could lead to potential security vulnerabilities. A total of 0 reviewed findings were uncovered during the analysis.

Issues by Fortify Priority Order

Recommendations and Conclusions

The Issues Category section provides Fortify recommendations for addressing issues at a generic level. The recommendations for specific fixes can be extrapolated from those generic recommendations by the development group.

Project Summary

Code Base Summary

Code location: D:/kiro/dmp_flowable/scripts/etl
Number of Files: 2
Lines of Code: 857
Build Label: <No Build Label>

Scan Information

Scan time: 00:53
SCA Engine version: 25.2.0.0116
Machine Name: TWTP1NB3010
Username running scan: ALBEE.LAI

Results Certification

Results Certification Valid

Details:

Results Signature:

SCA Analysis Results has Valid signature

Rules Signature:

There were no custom rules used in this scan

Attack Surface

Attack Surface:
Environment Variables:
null.null.null
os.null.getenv

Standard Input Stream:
null.null.input

System Information:
null.null.null
null.null.__python_get_last_exception

Filter Set Summary

Current Enabled Filter Set:
Quick View

Filter Set Details:

Folder Filters:
If [fortify priority order] contains critical Then set folder to Critical

If [fortify priority order] contains high Then set folder to High
If [fortify priority order] contains medium Then set folder to Medium
If [fortify priority order] contains low Then set folder to Low
Visibility Filters:
If impact is not in range [2.5, 5.0] Then hide issue
If likelihood is not in range (1.0, 5.0] Then hide issue

Audit Guide Summary

Audit guide not enabled

Results Outline

Overall number of results

The scan found 0 issues.
